

How to add a search box to your website using SquareSpace

Reference Materials

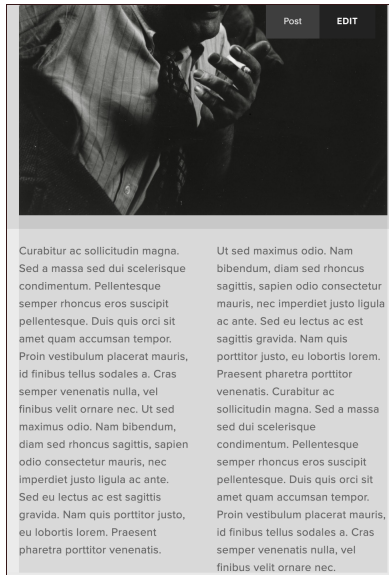

- [Findhelp Support - Add a Simple Search Box](#)
- [Squarespace Third Party Customization](#)

Overview

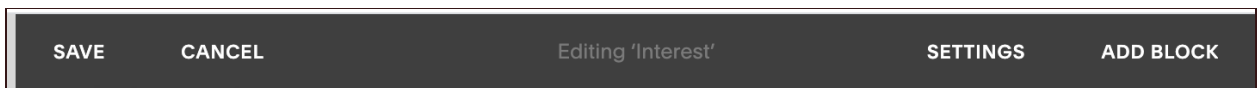

- The Simple Search Box, sometimes also called a search widget, is an embedded line of code that can be easily added to any website. Once inserted, this code displays a search box inside of an i-frame that allows users to type in their zip code and start searching for services straight from your webpage.
- For a SquareSpace website, you will need to have either the Business or Premium plan in order to utilize this feature.

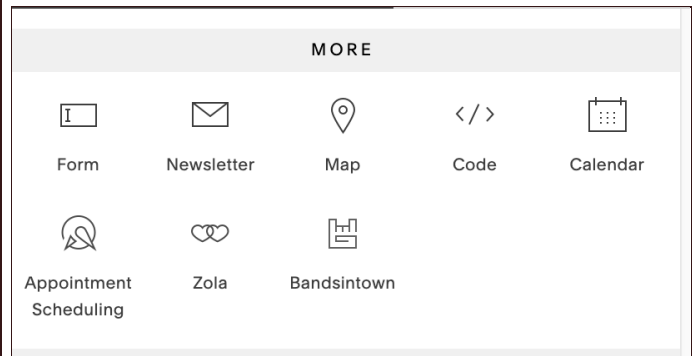

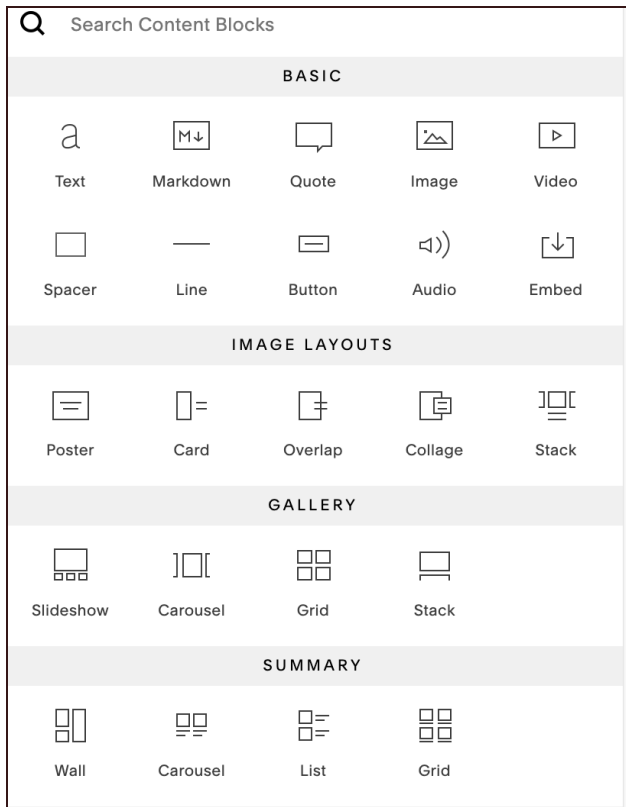

Steps

- Navigate to the page where you'd like to embed the Simple Search Box and choose to and choose the 'Edit' option.

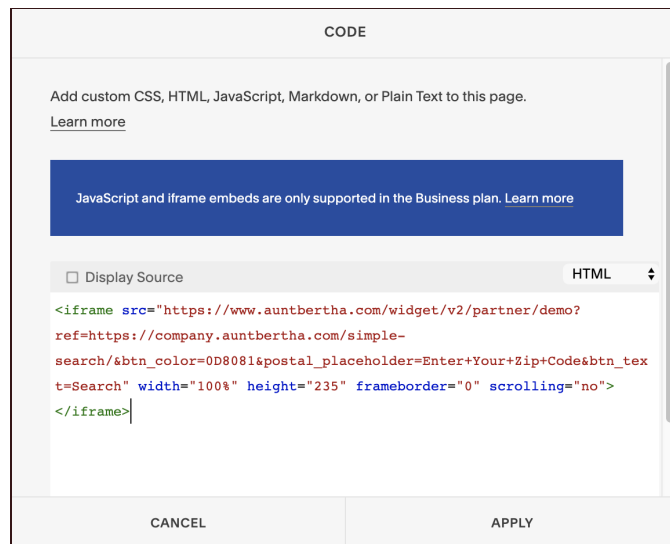

- Click 'Add Block'.

- Scroll down through the menu options to the ‘More’ section and choose ‘Code’ (see icon </>).
- Copy and paste the code provided to you by the Aunt Bertha team into the white box at the bottom of the page. Once done, click ‘Apply’.

- You should now see the search box populate. Make sure to save the edits by clicking the ‘Save’ button in the top left.
